

HOÀNG YẾN NHI

DATA ANALYST

Address: Me Tri Thuong, Ha Noi City
Phone: 0389405160
Date of birth: 11/02/2005
Email: hoangnhy0211@gmail.com

CAREER OBJECTIVE

I possess a solid foundation in data analysis and logical thinking, with a clear career objective to become a Data Analyst. I have developed my skills through personal projects. I am a proactive learner, dedicated to continuous improvement, and committed to contributing tangible value to the team through analytical insights and a growth-oriented mindset.

WORK EXPERIENCE

Business Analyst Intern (Focus on Data & Analytics)

Minova Group (01/04/2026 - now)

– Data Visualization & Dashboard Development:

- Collaborated with clients to analyze complex business formulas and metrics; translated raw business requirements into interactive and insightful data visualizations.
- Designed and developed project management dashboards, enabling data-driven decision-making for internal teams and stakeholders.

– Requirement Elicitation & System Integration:

- Conducted client-facing meetings to gather, analyze, and document business requirements for system enhancements and new feature deployments.
- Analyzed data flows and system logic to successfully integrate third-party platforms (Facebook API, Chatwoot), ensuring seamless data synchronization.

– System Testing & AI-driven Process Optimization:

- Mastered core system architectures and leveraged advanced AI tools (GStack, etc.) to optimize analytical and operational workflows.
- Executed system testing, identified data/logic anomalies, logged issues, and utilized AI prompt engineering for root cause analysis and immediate issue resolution.

PERSONAL PROJECTS

1. Bank customer churn prediction

Personal Project | June 2025 - July 2025

- Transform Data: Cleaned and standardized data using Power Query
 - Created 7 new financial indicators to visualize individual risk.
 - Dashboard Design: Designed interactive dashboards using line, bar, matrix, and card visuals, with conditional formatting to highlight performance trends.
- Analyzed financial performance across time, regions, and customer segments to support strategic decision-making.

2. Churn Prediction

Personal Project | Aug 2025 - Sep 2025

- Analyzed data of 100,000+ customers to build a risk segmentation system.
- Preprocessed data using Python: handled outliers, multicollinearity, variable encoding, oversampling, and data normalization.
- Trained Linear Regression model for risk prediction.
- Proposed customer segmentation and early warning system based on risk groups.

3.RFM

Personal Project | Jan 2025 - Feb 2025

- Developed a customer segmentation and hybrid recommendation system for records to optimize marketing and personalize user experience
- Proficient in the end-to-end process of building Power BI reports, combining analytical thinking with data storytelling to deliver clear and insightful financial narratives.
- Segmentation & Modeling: Engineered an RFM scoring system on 100k+ records to classify
- Propose "Win-back" campaigns and cross-selling strategies to maximize CLV.

4.House Price Prediction

Group Project | Sep 2025 - Oct 2025

- Development: Built models on 100,000+ records to predict service friction points
- Trained 4 models (Linear Regression, Random Forest, XGBoost) for risk prediction.

EDUCATION

Thuong Mai University
Major: Finance and banking
(2023-2027 expected)

CERTIFICATIONS

- Data Analyst MindX
- Mos (Word, excel - 2019)
- Vstep level 4
- Ielts 5.5

KEY SKILLS

- Frameworks & Libraries: Pandas, Numpy, Scikit-learn, Seaborn, Matplotlib.
- Model: Supervised, Unsupervised.
- BI Tools: Power BI, Excel, Python.
- Data Analysis: ETL, EDA, Prescriptive, Descriptive, Diagnostic, Predictive Analysis.
- Database & Platforms: MySQL, Oracle, SQL Server, Azure Data Studio.
- Soft Skills: Cross-functional Collaboration, Communication.
